

Dr Mark W Beinker

Partner

Dr Mark W Beinker is Partner at d-fine, one of Europe's leading financial services consulting firms, where he is responsible for the financial engineering business unit.

Dr Beinker manages projects in development and implementation of models for valuation and risk sensitivity calculation of structured financial products, approval of valuation methods and tools, risk analysis and re-engineering of financial transactions, integration of valuation libraries into the existing system environment, introduction of innovative financial products, development of hedging strategies, and the outsourcing of product valuation services.

In Addition, Dr Beinker is responsible for the valuation platform MoCo. MoCo is d-fine's bespoke valuation library which offers a broad variety of generic methods for the valuation of interest rate, equity, FX and credit derivatives with both single and portfolio underlyings. MoCo is d-fine's most important tool on all projects dealing with the valuation of financial products. The library is permanently under development to keep track with market trends and the development of new models, methods and products.

Dr Beinker gained his PhD at the universities of TU Dresden and Duke University in Durham, North Carolina. His professional career began at *Arthur Andersen* where he held the position of Manager within in the "Financial and Commodity Risk Consulting (FCRC)" group in Germany. Though he participated in a broad range of projects throughout his business career, the valuation of financial derivatives has been his focus since 1997.
