

d-fine and FERNBACH are
pleased to invite you to an

Executive Breakfast at Tower 42 addressing the challenges of: “Basel II & IFRS Convergence”

Friday 26th May 2006
London

Regulatory requirements (and specifically IFRS and Basel II) are pushing for more convergence, reconciliation and consistency of data.

On the one hand, regulators require reconciliation between risk and financial figures, and on the other hand, IFRS and Basel II require more common and centralised data. How do you address these challenges? How can you construct a consistent data management structure? How can we establish a set of common rules applicable to both IFRS and Basel II?

The Agenda

- What does the regulator say about reconciliation?
- Key challenges for reconciling risk and financial figures
- Latest developments in convergence: impairment treatment

Breakfast will be served from 8am; the presentation and discussion will start at 8.30; the event will conclude at 9.30.

Participation is free but you are kindly requested to RSVP to
